Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Neither Yu nor Hjaltason, taken alone or in combination, teach or suggest the claimed tiling of a query geometry for conducting a search of a search area comprising interior and boundary tiles of the query geometry... wherein the objects in the database are indexed using a linear quadtree index, wherein the query object is a non-point object and wherein the objects in the database include a non-point object... as recited in the independent claims. Applicants' arguments filed 20 May 2004 provide specific, detailed analysis as to differences between the point data algorithms and the claimed non-point data algorithms.

Other prior art of record, including Castelli (US 6,134,541), Smartt (US 5,963,956) and the article by Samet, disclose data structures and nearest-neighbor algorithms similar to those of the claims, but fail to teach or suggest the above-mentioned steps in combination with the remainder of the method for locating neighbor objects of a query geometry as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
